

NIT ROURKELA RANKED NUMBER ONE AMONG ALL NITS-EDU-RAND SURVEY for 2014-15

NIT Rourkela is number one among all NITs as per a survey conducted by EDU-RAND for the academic year 2014-15. It is also eighth among all engineering Institutes in India including IITs. This is the second time in a row it has maintained this ranking.

EDU and the US based RAND Corporation, have come together to create this India specific rankings. While EDU is a community platform for academics, administrators and business leaders in Indian higher education, RAND Corporation is a not-for-profit global research house known for its extensive work in education. A team of scientists with RAND developed the methodology for the Rankings. They judged the colleges on faculty qualifications, research productivity and programme accreditation and scored each parameter on the scale of zero to ten. The scores on these three were then combined to produce the overall rankings. These scores were related to student academic performance obtained through an independent source. Additional data on fill rate and employability of students was also collected from institutes wherever it was available. (Source: www.Pick-a-College.com)
