

The world needs to grow Fifty percent more food by 2050 using less land and resources while reducing the carbon footprint of agriculture.

That means, changing the way we treat our land, grow our crops and produce and distribute our food.

## About Biotez Agrinovation

Biotez Agrinovation Pvt. Ltd. is at the forefront of this change. We use our technical expertise, market reach and wide network of farmers to develop and provide innovative solutions with vision to lead our country towards the Green Revolution 2.0, a more efficient, socially collaborative and sustainable version of the First Green Revolution.

BETTER FUTURE**

## Our Mission

We are on a mission to lead India towards the Green Revolution 2.0. A more efficient, optimized and sustainable version of the First Green Revolution that results in better crop yield, fertile farmlands, organic waste recycling, reduced carbon footprint and a healthier Indian society

## What We Do

We research and develop high-quality products for plant nutrition. Our compost and fertilizers are one of the best in the market.

In addition to this, we promote local post-processing of agro-produce, development of storage and trade infrastructure locally, agricultural research by farmers and women run enterprises.

Furthermore, we provide training and necessary resources to farmers for Organic farming, Waste management, Agri-entrepreneurship and Resource management for sustainable and profitable farming.

## Our Products

Our product portfolio is the most comprehensive selection of bio-based nutrients in the industry.

Our products:

- Bio-compost
- Algae based bio-fertilizer
- Bio-fertilizer
- Bio-pesticide
- Vermi compost
- Plant booster

## Value Added Products

- Herbal products
- Food Products

## Our Services

- Agricultural Research and Development
- Soil testing
- Compost and Fertilizer testing
- Skill development and training for Agri-entrepreneurship.

## Who We Are

We are a team of Biotechnologists, Engineers and Farmers working together with the mission of making Indian Agriculture more efficient, and environmentally sustainable.

We take on innovative approach to design and provide effective products for technologically advanced farming and food production.

## Our Vision

We have a vision to make India a global role model for sustainable agriculture, waste management, food production and food security.
