First time in history, NITR Office Automation Cell has delivered its automation software to an external academic institute through a purchase agreement. Based on request from NIAMT Ranchi, the NITR automation cell has customized its faculty recruitment module over a duration of one month. The recruitment portal: <https://recruitment.niamt.ac.in/faculty> is activated on 13 January 6.00 P.M.

In this occasion the Director, NIT Rourkela, Prof. K. Umamaheshwar Rao has congratulated the Automation Team with following messages.

It is heartening to know that the Automation cell, NIT Rourkela have developed a web portal for NIAMT Ranchi. This shall facilitate the institute to process the faculty recruitment in their institute more effectively. It is only possible with a relentless hard work of the faculty and staff members of the automation cell.

The letter from NIAMT for this portal came with a request to create a web-based faculty recruitment portal. Indeed, they wanted it at the earliest as the mission mode faculty recruitment process was to be initiated, as suggested by the Ministry of Education.

I take this opportunity to earnestly thank every member of the team in Automation Cell for keeping up our word to NIAMT and for your efforts for a timely completion of the task.
